2.2.4. Physical connection {#sec2.2.4} The "Universal Sensor" board is powered by a DC output of the "CC2650 module" and "RFID IC module" to operate and read the RFID IC card. The "Universal Sensor" board is connected to the "CC2650 module" and "RFID IC module" using the "10-pin terminal block" to connect the boards together. [Figure 3]{#fig3}{ref-type="fig"} shows the connection diagram. Figure 3 Picture of the "Universal Sensor" board connection. Figure 3 82157476af
