

Passwarepasswordrecoverykitenterprise

The screenshot displays the Passware Password Recovery Kit Forensic application. The main window title is "Passware Password Recovery Kit Forensic". The interface includes a menu bar (File, View, Tools, Help) and a toolbar with navigation and control buttons (Back, Forward, Start Page, Pause, Stop, Check for Updates, Support, Help).

On the left sidebar, the "Recovery Progress" section shows:

- Passwords found: **0 passwords**
- Total time elapsed: **1 min. 32 sec.**
- Estimated completion time: **1 min.**

The "Recovery Progress" section also shows:

- Checking password: **ninospo**
- Length: 7
- Passwords checked: **54,401**
- Search speed: **1,069 p/sec**
- Total passwords checked: **54,401**

The "Distributed Agents" section shows "Detected: 4".

The main area displays the target file: **C:\Users\Nataly\Desktop\!!!evidence\evidence\Distr.rar**. The protection is **RAR 3.x-4.x - Extraction Password, AES Encryption** with a complexity of **Brute-force - Slow, Hardware acceleration possible**. The attack is **Reverse Password Modifier: Original Password (Dictionary)**. The estimated completion time is 1 min. A progress bar is shown below the attack progress section.

Below the progress bar is a table of agents:

Connection Type	Status	Agent IP	Search Speed	Agent Contribution
Direct	Running the current a...	[built-in]	890 pwds/sec (79.39%)	18,883 passwords (35.18%)
Shared	Location: the current a...	[NATALYVAIO] 1...	0 pwd/sec (0.00%) [spe...	6,204 passwords (11.56%)
Shared		92.168.0.14...	99 pwds/sec (8.83%)	2,056 passwords (3.83%)
Shared		-PC] 192.1...	132 pwds/sec (11.78%)	2,306 passwords (4.30%)
Shared		192.168.0.11...	0 pwd/sec (0.00%) [spe...	0 passwords (0.00%)

A context menu is open over the second row of the table, showing options: Connect Agent(s), Disconnect Agent(s), Restart Agent(s), Show Agent(s)' Status, and Select All (Ctrl+A).

At the bottom of the window, there are tabs for "Passwords found", "Agents", "Performance", "Attacks", and "Log". The "Agents" tab is currently selected. The status bar at the bottom left indicates "Password recovery in progress...".

It is the only open source solution that produces fully compliant password hashes as the output. Passware Kit includes an extremely fast hash cracker that is capable of recovering passwords from in-memory brute force attacks. In addition to recovering passwords, Passware Kit is able to detect and remove the Microsoft Internet Explorer redirector to prevent drive-by compromises. It can also recover passwords from encrypted files, remove hidden drives, and find password protected documents, ZIP archives, encrypted ZIP archives, ZipCrypto, ECM certificates, and many more. It also allows you to detect and prevent root kits and viruses. The product has been in public beta since September 2004 and is the only fully open-source solution. Technical Passware Kit consists of three components: Passware Kit Crack is a password recovery tool written in Java.

It is both an anti-theft tool and an intrusion detection tool, and also allows forensic analysts to recover passwords for digital evidence purposes. MD5Crayfish is a password cracking program that uses a Cray computer as its main processor. It is used by Passware Kit to crack user passwords. Passware Kit Crack is an advanced GUI interface for MD5Crayfish that also allows the user to perform multiple operations, such as recovery of passwords and the removal of Microsoft Internet Explorer redirector. Features It is written in Java and utilizes the MD5 message digest algorithm to crack passwords. It is protected against drive-by attacks through several methods including hash cracking and the removal of the Microsoft Internet Explorer redirector.

Additionally, the product includes the following features: Detects and removes the Microsoft Internet Explorer redirector.

Detects and removes root kits and viruses. Detects and removes hidden drives. Detects and removes hidden certificates and certificates. Detects and removes hidden ZIP archives and encrypted ZIP archives. Detects and removes encrypted files. Detects and removes encrypted archives. Detects and removes encrypted ZIP archives with embedded passwords. Detects and removes encrypted files with embedded passwords. Detects and removes ECM certificates. Detects and removes password-protected ZIP archives. Detects and removes PDF files with embedded passwords. Detects and removes CIF files with embedded passwords.

Detects and removes password-protected files. Detects and removes password-protected archives. Detects and removes password-protected documents. 82157476af
